

2D Spiral Array

variables

```

let dx = [1, 0, -1, 0]
let dy = [0, 1, 0, -1]
var dir = 0
var value = 1
var n = size
var limit = n * n
    
```

} right turns

// +1 % 4

// +1 < n²

func isValidDirection(grid, r, c, size) {

return r >= 0 || c >= 0 || r < size || c < size || grid[r][c] != 0

attempt 1: 3h 1 min
painful - don't know 2D traversals

while
